

Declaration of UK & EU Compliance – Persistent Organic Pollutants (POPs)

Regulatory Compliance Statement

Bloomice recognises its responsibility to protect human health and the environment by ensuring compliance with applicable environmental legislation governing the restriction of Persistent Organic Pollutants (POPs). Persistent Organic Pollutants are chemical substances that persist in the environment, accumulate through biological food chains, and present risks to ecosystems and human health.

Bloomice hereby declares that, to the best of its knowledge and based on supplier material declarations, product design data, and internal compliance controls, Bloomice products comply with the requirements of:

- Regulation (EU) 2019/1021 on Persistent Organic Pollutants, including subsequent amendments
- UK Retained Regulation (EU) 2019/1021, as implemented under United Kingdom environmental legislation

Bloomice confirms that its products do not intentionally contain substances restricted or prohibited under Annex I of the above regulations above applicable threshold limits.

Scope

This declaration applies to all Bloomice branded:

- Antenna systems
- RF components
- Associated electronic assemblies
- Related accessory products

Unless otherwise stated in specific product documentation.

Compliance Controls

Bloomice maintains POP compliance through:

- Supplier material compliance verification
- Monitoring of regulatory substance updates
- Internal product compliance review procedures
- Integration within quality and environmental management systems

Declaration Limitations

This declaration is based upon information provided by Bloomice suppliers and component manufacturers together with Bloomice product knowledge and due diligence processes.
